Osprey, a leader in the weapon accessory industry for over 20 years, concentrates on cutting-edge, niche products that are innovative in design and performance for our discerning customer base. Our entire product line also carries a full, no nonsense, no fault lifetime warranty. Our chamberable boresight system has been tested in Iraq and Afghanistan and approved for use by the US Military for the sniper accessory kits. It is simply the best boresight system in the world.

Over the past decade we have introduced our Osprey rifle scope line, which we painstakingly developed over many years. Below are some of the points which separate Osprey from all the others. Our rifle scope line is assembled in the ONLY US owned and managed facility in China where we utilize Chinese labor but not Chinese components. For example, the lenses used in our tactical scope family are from Hoya of Japan, and we import 3M and Loctite two part epoxies and hermetic grease from the United States for all bonding applications. 100% of the units are inspected for fog-proofing and water-proofing, and every scope is tested and warranted for shock to 50 BMG parameters (1000g/0.4-0.8ms). Each scope is also spin-centered for balance and possess fully, multi-coated glass lenses throughout with glass-etched reticles.

Our scopes have now reached sales of over 500,000 plus units and in devoid of being bias we feel it is the best scope dollar for dollar ever available. Albeit we may seem to be making some bold and pretentious statements, but we feel anyone who purchases our scopes will agree.

We will also work to continue improving our many other key products including but not limited to green lasers, tactical lights, red lasers, and the many other items we have provided in years past.

Keith Oliver  
CEO

To our valued current and future customers,

We are excited to present our newest product line for 2018. As a former NFL player, and first round draft pick for the Baltimore Colts in 1977, I've always understood the importance of bringing your best to the game; I believe with this product line, we have.

Osprey Global is constantly striving to develop the most innovative and cutting edge products in the industry. Our mission is to provide the highest quality accessories at an affordable price; and to provide the best warranty and customer service you will find anywhere.

Client satisfaction both in repurchase and referring others to our products has been the impetus for our astounding growth since we began in 1995. As always, customers will be at the center of our thinking as we continue to create and innovate new products that will surprise and thrill both the new and the seasoned outdoorsman (and woman!).

Feedback from you remains an invaluable tool for product improvement and new product development. It is the main reason you will see Keith and I attending shows all over the country. I always look forward to seeing old friends and new ones as we travel. Please stop to say hello when you see us at the show.

Warmest Regards,

Randy Burke  
*President*

# OSPREY GLOBAL RETICLE PATTERNS

- Built in only US owned and managed facility in China
- Chinese labor is utilized, but no major Chinese components
- US made 3M or loctite epoxy used in all bonding applications
- Imported hermetic grease is used for superior waterproof and fog proof performance
- Recoil tested at 50 BMG parameters (1000g/0.4-0.8 ms)
- Waterproof tested at 25 cm/40 degrees C for three minutes
- Fog-proof tested at 20 degrees C for thirty minutes and removed to ambient (Each scope must completely clear in 2 minutes)
- Each scope is spin centered for balance before leaving the factory
- No nonsense lifetime warranty / three business day repair or replacement
- Optical lenses from Hoya of Japan\*
- 100% of all units are inspected to ensure quality
- Each scope is equipped with air-to-glass surfaces and are fully multi-coated\*
- Inside each body tube is specially treated with anti-reflective paint and light stops to reduce internal reflections\*

Mildot (MD)

Rangefinder (RF)

\* Economy models excluded

**1 Objective Lens** - Front lens denoted by the last number in the scope description (i.e. 3-9x42 means the diameter of the front lens is 42 mm)

**2 Variable Magnification** - The “power” of the scope denoted by the first series of numbers in the scope description. The power will bring an object in closer (i.e. 3-9x42 means the scope has a “variable” power from 3 to 9).

**3 Windage Adjustment** - The turret on this side of the scope will adjust the reticle from left and right allowing for wind conditions.

**4 Elevation Adjustment** - The turret on top of the scope will adjust the reticle up and down allowing for bullet dropage.

**5 Ocular Lens** - The viewing lens of the scope closet to the eye. The ring of the ocular lens adjust the clarity of the reticle.

**6 Parallax Adjustment** - Usually only necessary on scopes with power ranges higher than 12. It is located on the left side of the Osprey scope adjacent to the windage/ elevation knobs. This allows for focusing at higher magnifications.

**7 Illumination Control** - The illumination knob is available in 3 colors (red, green and blue)

**8 Exit Eye Pupil** - The larger the exit pupil the brighter the image

## MILDOT SIGHT

A mildot reticle is named for the dots and spaces it is composed of. The space between the dots is one milliradian, or “mil” for short. A mil is a unit of angular measurement, like degrees or minutes of angle. It represents one unit of angular width for every 1,000 units of distance. This arrangement is very useful for determining the distance of objects of a known size.

If the size of an object is known, its distance can be calculated as follows. Measure the object with the reticle, counting how many mil sections it covers. Dividing the size of the object by the number of mils and multiplying by 1000 can now calculate the object’s distance.

$$(\text{object size}/\text{quantity of mils}) \times 1000 = \text{distance}$$

Note that the unit of measurement used for object size and the calculated distance will be the same. That is, if the object size is in yards, the calculated distance will also be in yards; if size is in meters, distance will be in meters.

Example: An object has a height of 2 yards. With the reticle, this object is measured and found that it covers exactly 5 mils.  $(2/5) \times 1000 = 400$  yards or if the same object is measured in meters:  $(1.83/5) \times 1000 = 366$  meters

## TRAJECTORY & DEFLECTION

To accurately engage a target at a distance greater than sight-in, requires that the trajectory of the specific load being used is well understood. This is available from ammunition suppliers, derived from external ballistic software, or determined by actual use. In the above example, an object’s distance was determined to be 400 yards. If zeroed at 100 yards, a specific load may drop by 25.6 inches at that distance. The value of one mil at 100 yards is slightly greater than 3.6 inches. (This equates to 7.2 inches at 200 yards, 14.4 inches at 400 yards, and so on.) Knowing this, it can be calculated that a little less than 2 mils of up elevation is needed. The reticle can then be used as a “hold over” guide to quickly engage the 400 yard target. If susceptibility to wind drift is known for the load being used, the dots on the horizontal axis can be used in a similar fashion as references to compensate for wind deflection or lead in the case of a moving target.

Ideally, adjustments for distance and deflection should be made with the windage and elevation knobs. But the mildot reticle is a useful quick aiming reference.

**RANGEFINDING OVERVIEW**

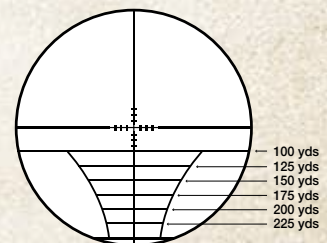

The rangefinder reticle is designed to enhance the long range accuracy and ranging capabilities of the average shooter. The range finder reticle has two separate parts; the first part is the aiming reticle, while the second half is a “choke style” range estimator. The hash marks in the center part of the reticle are spaced in 5 MOA increments from one another. This is used to quickly determine the size of larger objects, as well as be used for bullet drop compensation for long range targets. (1 MOA is equal to 1 inch at 100 yards, thus 5 MOA is equal to 5 inches at 100 yards)

The rangefinding “choke” in the lower portion of the reticle is a pair of curved lines that taper down. The “choke” has a series of horizontal lines that correspond to a specific range in yards. This “choke” is calibrated for the average sized human shoulder width of 18 inches. You will be able to estimate the distance of a human silhouette or any other 18 inch wide target.

To utilize the “choke” reticle, you will need to bracket the edges of the target between the tapering choke lines. (ill. 1)

After bracketing the target in the choke, count the number of lines down the choke to determine the target distance. The top line is equal to 100 yards with each line below being further in 25 yard increments. (ill. 2)

The “choke” lines are not intended to be used as a ballistic reticle. This portion of the reticle is only intended for the range estimation of an 18 inch target. After “ranging” your target, make the appropriate adjustments to the Bullet Drop Compensator (BDC) if equipped on your scope, or adjust your scope’s elevation to compensate for the bullet drop at the determined range.

# OSPREY GLOBAL COMPACT SCOPES

## COMPACT 3-9x42 IRF/MDG

Osprey compact rifle scopes insure the quickest acquisition of your target, perfect for close quarters with industry's best eye relief (includes dust covers and rings).

### BDC:

308/243, 223, 7.62X39, 30-06/25-06/270WIN

### Scope Highlights: Compact 3-9x42

- Assembled in only US owned and managed facility in China
- Imported Japanese Hoya Glass
- Imported 3M epoxy and hermetic grease from the United States
- Completely waterproof
- Completely fog-proof (each unit is "purged" prior to nitrogen injection)
- Shock-resistant to 50 BMG parameters
- Illuminated reticles with gradual brightness controls
- Spin centered for balance
- Anti-reflective paint applied and light stops added to reduce reflections and provide high-contrast image
- Lifetime Warranty

**COMPACT 4x32 MDG**

This Osprey scope has a fiber optic front iron site paired with adjustable rear site, perfect for the upfront and close type shot.

**1-4x24 MDG**

The perfect scope for the AR platform, offering max accuracy and reliability to master every situation (includes dust covers and rings).

**1-6x24 IRF**

The Osprey 1-6x24 will give you a sight picture that is incredibly bright, clear, and precise (includes dust covers and rings).

**2.5-10X40 MDG WITH 5MW GREEN LASER**

This scope offers a 2.5-10x magnification. Designed for targeting close to midrange. Includes a green laser allowing you to zero in on your target. Also includes dust covers and pressure pad.

# OSPREY GLOBAL TACTICAL SCOPES

### TACTICAL 4-16x50 IRF / MDG

Engineered for peak results. Get your eyes on your target first with undeniable accuracy. We use fully multi-coated Hoya glass with audible turret clicks.

*BDC available / 3 & 5 inch sun shades*

### TACTICAL 6-24x50 IRF / MDG

America's premier rifle scope at everybody's price point. If you hunt or target shoot this scopes versatility is your go to scope. We use a 30mm tube to ensure you get the much needed light for the dusk or dawn hunts.

*BDC available / 3 & 5 inch sun shades*

### TACTICAL 10-40x50 IRF / MDG

Designed for long range shooting with a generous eye relief. Epoxy is used on all Osprey tactical scopes to ensure they handle the larger caliber rifles. Be ready for your next hunt or competition with this exceptional scope.

*BDC available / 3 & 5 inch sun shades*

### TACTICAL 5-30x56 MDG

This scope will meet your demands for extreme hunting scenarios. Osprey's top-tiered Hoya glass and pinpoint accuracy reticle is built to exceed your expectations.

## LASERS

### COMPACT GREEN LASER

The CP green laser has a 3 point touch system. It will allow you to turn it on by touching the pressure points which are located on both sides of the laser housing. Press it again and it will go into the strobe mode. Pressing again will turn it off.

### RAIL GREEN LASER

The green rail laser is perfect to track targets and great for home defense. The on off and strobe function is designed for easy operation. Push the tab bar left or right and it will turn on or strobe. Center position is off.

### GRN-OSP-GLR

**NEW ITEM!** Check out our website [ospreyscopes.com](http://ospreyscopes.com) for the latest info on this product!

### MINI RED LASER

This Osprey Mini Red Laser is the perfect quick addition to any firearm. The extra bright red laser has a four-point alignment system for improved accuracy and ease of calibration. Osprey made the casing and electronic components shock resistant, engineered to withstand tough conditions.

### ULTRA THIN RED LASER

This ultra thin mini red laser is designed to mount directly to your firearm. It can be controlled by constant ON/OFF button or wire pressure switch.

### RIFLE BLUE LASER

The blue rifle laser works great in higher and lower temperature conditions. This laser has 4 times the battery life compared to the green laser and will let you stand out with the blue violet color.

## LIGHTS

**BATTLEGRIP GREEN LASER**

The Osprey tactical vertical grip with integrated laser and flashlight and weaver style mount will give you the advantage. This fore grip has its arsenal including a 500 lumen light with a map light and green laser with trigger control. A must for your tactical gear.

**BATTLEGRIP BLUE LASER**

Osprey's Vertical Foregrip / battlegrip lighting system, designed to mount to the underside of your rifle's fore end (standard Mil 1913 picatinny or weaver rail). Osprey's Foregrip / battlegrip lighting system provides exceptional weapon control, visibility with dazzling 750 lumens of incandescent beam, strobe feature, pilot light for easy navigation, and dead on accuracy.

**GREEN LASER LIGHT COMBO**

The Osprey Green Laser and Flashlight Combo has been designed to be the perfect tool for any tactical operation. This laser sight from Osprey is made using insanely long lasting materials that are guaranteed to last for an incredibly long time. For a great way to zero in on your target, choose the Osprey Green Laser and Flashlight Combo Sight.

**FL-OSP-230 TACTICAL LIGHT**

230 Lumen Tactical Flashlight with quick release mount. Durable aluminum alloy and slide switch.

**FL-OSP-600 TACTICAL LIGHT**

600 Lumen Tactical Flashlight with optional on/off button or pressure switch controls. 3 brightness settings as well as a strobe feature.

**LASER DESIGNATOR**

This laser has the ability to cover your target from head to toe with its adjustable coverage. Comes with 3 reticle inserts and great for the Coyote hunter.

# OSPREY GLOBAL ACCESSORIES

### COMPACT BDCs

Sizes: CP .308 BDC, CP 7.62X39 BDC, CP 223 BDC, CP 30-06 BDC

### TACTICAL BDCs

Sizes: TA .223 BDC, TA .308 BDC, TA 7.62x39 BDC, TA .30-06 BDC

### TACTICAL SLINGS

Available in green, black and tan. Osprey Bungee 1 or 2 Point Sling converts from two point to single point. This Osprey Gun Sling has dual high strength bungee construction and features HK snap hook adapter covered with elastic cover and side-quick release buckle.

### 3" AND 5" SUNSHADES FOR 50MM TACTICAL SCOPES

Made of aluminum alloy, fits 50mm tactical models. Reduces glare in bright light and can be put together to make an 8" sunshade.

### 3" AND 5" SUNSHADES FOR 56MM ELITE SCOPES

Made of aluminum alloy, fits 56mm Elite models. Reduces glare in bright light and can be put together to make an 8" sunshade.

### MT-RMQ

Short AR-15 mount, complete with quick release mount.

### QUICK LATCH MOUNTS

Gives you the ability to quickly increase or decrease magnification even with gloves on. Made specifically for certain Osprey scopes.

### STEEL SCOPE MOUNTS

Fits 30mm scopes. Sizes: Low steel rings height 1 5/8", Medium steel rings height 1 3/4", High steel rings height 1 7/8", X-High steel rings height 2 1/8"

### QUAD RAILS

The Osprey 2-piece/carbine length quad rail handguard allows the operator to mount vertical fore grips, lights, lasers and optics on the handguard. Lightweight aluminum construction adds versatility without adding weight. Available in black, tan and green.

### FREE FLOATING KEYMOD HANDGUARDS

Osprey's free floating keymod handguards come in 4 lengths.

Sizes: 7 inch, 10 inch, 12 inch and 15 inch.

### QUICK DETACH SLING PLATE

One piece sling mount that goes over castle nut. Ambidextrous with push button on top for quick release from sling.

### 45 DEGREE ANGLE MOUNT

Allows user to rotate weapon 45 degrees for quick acquisition. Fits a 45 degree offset picatinny mount. Attaches to weaver or picatinny.

### RISERS

Made of aluminum alloy, available in multiple lengths and heights (inch or half inch).

### AK SIDE RAIL SCOPE MOUNT

Made of aluminum alloy, attaches to side rail of AK47, easy to install.

### MID-LENGTH FREE FLOATING HANDGUARD FOR AR15

Made of aluminum alloy. Has 4 detachable rails, optional rail placement even at 45 degrees, easy to install. Mil spec 1913 picatinny. Fits on AR15, M4 and M16.

### 4.15 INCH FREE FLOATING HANDGUARD

Made of aluminum alloy. Comes with barrel nut and jam nut, easy to install. Mil spec 1913 picatinny. Fits on AR15, M4 and M16.

### LADDER RAIL COVERS

These have 4 pieces and can be cut to size carbine length. Protects unused rail and safe guards hands. Available in black, tan and green.

### RUBBER RAIL COVERS

Engineered to survive the most extreme conditions. Constructed from durable, heat and chemical resistant polymer resin. Protects unused rail space from damage. Available in black, tan and green.

### F&N FAL QUAD RAIL HANDGUARD

This FAL 308 quad rail handguard is made of aluminum alloy. Mil spec 1913 picatinny.

### H&K MP5 DOUBLE RAIL CLAW MOUNT

H&K MP5 double rail claw mount with picatinny rail mounts. Allows the user to accessorize.

### SKS SCOPE MOUNT WITH 3 DIFFERENT PICATINNY RAILS

SKS scope mount with steel base, picatinny rail with 3 different lengths included. Easy to install. No gunsmithing required.

### PISTOL RAIL MOUNT

Easily convert your handgun to mount Osprey's reflex sights.

### CARRY HANDLE MOUNT

Turn your carry handle into a picatinny rail for mounting your scope onto your rifle.

### ONE PIECE MOUNT

Easily mount and detach your scope from gun to gun.

### 480 RINGS WITH RAIL LOW

Co-witness with your iron sights. For use with 1" scope or 30mm (shims included), top rail to add additional accessories, 1/4" height.

### 484 RINGS WITH RAIL HIGH

Co-witness with your iron sights. For use with 1" scope or 30mm (shims included), top rail to add additional accessories, 1/2" height.

# OSPREY GLOBAL TESTIMONIALS

When I started working for Osprey I was hired as the office manager. I not only learned the ins and outs of the company but I was amazed at how Mr. Oliver didn't treat us like we were just employees, he treated us as if we were family! My husband and I were presented the opportunity to move to Las Vegas

and cover gun shows out west. After I had my baby we moved back south to Alabama where we currently cover shows. The thing I enjoy most when it comes to the gun shows is building relationships with customers, hearing the great feedback and selling one of the most outstanding scopes on the market today! The day I started working for Osprey is the day my life changed forever; I met Mr. Oliver whom is now like a father to me, I became part of the amazing family we have at Osprey, and I get to travel all over the country selling one of the most versatile and proven scopes on the market! Not only do I enjoy selling these outstanding optics but I like to use them personally, from the range to hunting, it never ceases to amaze me how durable, clear and unique these scopes really are! I feel like I have a dream job and can't wait to spend many more years as part of the osprey team! Happy shooting!!

**Niki Smyth**

*Deep South Optics*

I have literally grown up in this business. As a child I would travel with my father, Keith Oliver, all over the country watching him sell his products with a passion. I have never seen someone work so hard in my life to provide for their family. They say when you work for family you never really

leave work. I can attest to this. We, the Osprey family, never stop working to provide you, the customer, the best products at the best price. As COO for Osprey Global, I have seen this company grow so much just in the last 2 years that I cannot wait for what the future holds. Our new products are unlike anything we have put out in the past and we are excited to present these to you.

**Lindsey McIntyre**

*COO, Osprey Global*

Optics Power is an authorized distributor for Osprey Global. From the perspective of a small business owner in a highly competitive business, Osprey Global is truly a cut above the rest. It starts with Osprey's endless commitment to a higher standard and a never-ending focus on our customers' complete satisfaction.

The first day Optics Power opened its doors, the entire Osprey team was there to make sure our new business would succeed. From world class training, to providing us with optics that are perfectly suited to our customers' demands, they have been there for us. Being in sales for over 25 years and owning various businesses, we were able to quickly identify that Osprey is a company that truly cares about its family of distributors.

This commitment naturally has carried over into everything Osprey does, from creating a product line that's been a remarkable success, to R&D, to making sure our demanding customers are provided superior customer service.

Osprey Global has simply made owning and operating a small business "fun" again! My personal feeling is Osprey will be here for the long haul. How do we know this? The overwhelming customer satisfaction and the skyrocketing demand that increases every single day we open our doors for business!

**Christopher Tollette & Nia Scafidi**

*Optics Power*

Stan and Rhonda (RS Supplies and Optics LLC) are Osprey Reps that enjoy covering multiple states including Arizona, California, Florida, Idaho, Nevada, New Mexico, Oregon, Utah, and Washington. Their knowledge and enthusiasm about the Osprey product line, as well as their knowledge of firearms, is easily transferred over to their crew leaders. Leaders Kylan Asher, David Johnson, Chad Preston, Victor and Chris Calderon cover Arizona, California, Idaho, Nevada, New Mexico, and Utah. Chris Long and Nicole Aguilera cover Oregon and Washington. Florida is rounded up by Chris Tollette, Joey Smallegan, Marc Laverrierre, Gary Orland, Eric Windjack, and Michael Hamel.

I have bought 6 scopes from Osprey Global in the past couple of years, it doesn't matter what power I bought, the quality of the scope was as good as the other. Years ago I bought Bushnell & Leupold, yours are good as theirs if not better, at a lot better price. I will be buying more from you as the scopes you offer get better and change with the times. - **James**

I have used a competitor scope for over 15 years as a SWAT sniper. I picked up an Osprey Global Illuminated Mil-Dot reticle 4-16x50 scope. I have to say that I am more than impressed. The scope is mounted on a Remington 700 Tactical. The scope holds MOA out to 500 yards ( the limit of my range). I have banged the rifle, shot in the rain, changed the scope magnification, and the POI has not changed. These rifle scopes give you more bang for not as much buck. In my humble opinion, Osprey Global scopes are equivalent to or better than the higher priced Leupold scopes. Happy Shooting! - **New Jersey**

Amazing Scope for the price. I read the Amazon reviews and bought this rangefinder reticle version. Performs as advertised in the description. Couldn't be happier.

"After zeroing in the scope, the challenge became shooting all the white paper out of the 10 spot. Love the scope. Will only buy Osprey Global products in the future!"-**Tim**

**DON'T TAKE OUR WORD FOR IT, LISTEN TO THE VARMINT HUNTER!**

Osprey scopes are what they say "Clear – Rugged – Precise". I have Osprey scopes that have been on multiple rifles over the last ten years; with many thousands of rounds fired through each. They are still "Clear – Rugged – Precise". In the last two years I have started changing out my old scopes as they went bad; for Osprey Global scopes. My other scopes gave out and their warranty didn't cover everyday use like Osprey Global scopes life-time warranty. I dropped a rifle and damaged the scope, "my bad, my fault." I sent the scope to Osprey and told them; I dropped it, can it be fixed, they sent me a new one.

The Hoya lens are the clearest I've EVER used, the 30 mm tube with the illuminated Mildot reticles cover any light conditions I've come across in the field shooting many thousands of varmints. You can't go wrong with Osprey scopes with the quality, reasonable prices, and the way they stand behind their scopes.

*Will Scherer - The Varmint Hunter*

# OSPREY GLOBAL TESTIMONIALS

My name is Duncan Stone I am a competitive shooter and 12 year veteran of the United States Army. As a competitive shooter I demand a lot out of my weapon systems and optics. As a sniper scout in the US Military we demanded the best out of our weapon systems and optics. So for me to tell you that Osprey Global Optics is the only optic on the market would be wrong. But what I will tell you, is that Osprey Global has a lifetime warranty on their product and they stand behind product if something fails or goes wrong.

I have personally purchased the 10-40X50 Mil Dot and have had great success with the optic. The glass is clear and reticle is very crisp and holds the clarity through the power magnification. I own optics that cost much more and yes they all have their selling point. But the Osprey Global optic has its selling points also, it will hold zero with some of the brand name optics out there on the market now. I have this optic mounted on a LR 308 and it is shooting sub MOA groups at 200m and I have proof of a good group rapid fire at 400m which is included in this letter. So for any of you having second thoughts please consider this you can spend as much as \$3,000.00 for a brand name optic for a weapon you may never fire over 500m or you can spend a little less money and have money for the range. I can only say pick it up look through it and decide for yourself you will be amazed that you did not spend \$2,300.00 for a name.

Sincerely,  
**Duncan C. Stone**

As Vice President of Product Development, I take great pride in making sure the optics and accessories we manufacture cater to any weapon or shooting scenario. We push the limits with quick target acquisition through some of the best lenses in the business as well as incorporating precision turrets and reticles easy for anyone to use. Our durability tests are taken to an extreme level to insure performance even through the most adverse conditions. We do all this while keeping a true concern of user costs. Hunters, target shooters, tactical operators, even the casual shooter are all welcomed to our well diverse line of optics and accessories.

Being a veteran of the Army, where I served on the front line in a Reconnaissance Surveillance Target Acquisition unit, I have been around a plethora of weapons and weapons accessories. When someone can produce quick target acquisition with ease of use that is also durable, anyone can be a marksman and that is what Osprey brings to the table.

**Ryan King**  
*Vice President, Product Development*

As a longtime owner/user of 'expensive' scopes, I was a bit leery about purchasing an Osprey because it was so much less expensive than my usual scopes. My local Osprey dealer, Niki Smyth, convinced me to give Osprey a try so I bought a TA 6-24x50 IRF and tried it on my T/C Encore in 22-250. I liked it so much I moved the 6-24x50 to a bolt-action .223 and purchased an Osprey TA 10-40x50 IRF for the .22-250. Both work great. My latest experiment was to purchase an Osprey 4-16x50 IRF for my Rem 700 7mm Rem Ultra Mag. I've shot it enough to be confident that it still functions properly even after the pounding it has taken from the hard-kicking rifle. Best of all, the combined cost of all three scopes was about what I would normally have spent for just one of my usual brands.

A very satisfied customer,  
**Stan Kullman**

## OSPREY COMPACT 3-9X42 IRF SCOPE REVIEW

It was as if time stood still as I walked down the massive halls of the annual gun event known as S.H.O.T. Show which was hosted in Las Vegas, Nevada. It was a much-anticipated trip for the 2018 Brownells Youth Shooting Sports Ambassadors and promised to be the premier shooting trade show of the year to showcase the latest and greatest gun products.

Among the thousands of products available, I knew I wanted to look for a new scope. On Day 2 of the show, I stopped by the Osprey Global booth and was greeted by the Osprey team including their President, Mr. Randy Burke. They were down to earth and after learning they were headquartered in my home state of Georgia, they seemed like family. It was the perfect opportunity to learn the most in-depth product information and catch the vision behind the company's mission. They proudly introduced me to the Osprey Compact 3-9x42 IRF Scope. The company has taken impressive steps to secure state of the art resources. They believe in their products and do not hesitate to back them up with an incredible lifetime warranty which is a good proposition, especially for a young man like myself. The more they told me about it, the more I wanted to try it out.

I was thrilled to be able to immediately take the scope home. It was simple to attach to an AR-15 platform since it came with picatinny rail ring mounts and added little weight, at only 18.7 ounces. There was no doubt that the 3-9x42 was designed for efficiency and to be user friendly since it was only 2 inches off center when sighted straight out of the manufacturer's box. I had it fully installed and zeroed-in with 5 rounds in less than 10 minutes! The glass was impeccable with an objective lens of 42mm which helped illuminate the targets set in low light conditions. The lens was fog proof which was ideal for transitioning from ice box air conditioning to the stifling humidity of Georgia's warm weather. With the scope being water proof, it was durable enough to ride uncased on the front of a hunting 4-wheeler. This scope looks amazing with the matte black finish and I was grateful for the included dust covers.

The 3-9x42 was very impressive and the performance was true in close proximity or hundreds of yards out. The versatility allows you to set the optics to a zoomed-in picture for amazingly accurate long-distance shots. The use of ground breaking technology also lets you shoot with both eyes open and allows for quick follow up shots. Their one of a kind, fast focus eye piece, delivers crisp images as the sight rests close to the eye or is moved to varying distances away from the face. Osprey Global boasts the best eye relief on the market and the Compact 3-9x42 IRF Scope lives up to that promise. The Osprey team treated me incredibly well and I could not be happier with the performance of my new scope. I definitely recommend Osprey's Compact 3-9x42 IRF Scope to anyone in the market for a reliable and rugged compact scope. I am looking forward to using it with my gun for years to come. Big thanks to Mr. Burke and the Osprey team for such a well-crafted optic. For more information on this scope and other Osprey products, visit [www.ospreyscopes.com](http://www.ospreyscopes.com) or find them on your favorite social media forums.

**-Hunter Wealot**

## LIFETIME WARRANTY

At Osprey Global, we will repair or replace your Osprey product in the event it becomes damaged or defective—at no charge to you. If we cannot repair your product, we will replace it with a product in perfect working order of equal or better physical condition.

You see, it doesn't matter how it happened, whose fault it was, or where you purchased it. You can count on our warranty for all Osprey Global rifle scopes, tactical scopes, compact, first focal planes, red dots, lasers, binoculars, bore sights, and accessories.

- Lifetime Warranty
- Fully transferable
- No warranty card to fill out
- No receipt needed
